Sports Data Soccer API - Coverage Tiers And Types

A Coverage Tier is a level of coverage that is defined by the set of key coverage types, their periods and timings specific for each sport. The Soccer API offers the following different levels of coverage, depending on the specific feed.

Here, you will find a guide to the [Coverage Types](#) and [Coverage Tiers](#).

Coverage Types And Definitions

(B) = Before | (L) = Live | (A) = After/Post-match

KEY COVERAGE TYPE	DESCRIPTION
Results	Delivers scores per match
Scorers	Delivers goal scorers per match
Lineups	Delivers the lineup player names per match
Match Events	Delivers cards and substitutions
Match Events Premium	Delivers formations, assists, penalty shootout scorers
Match Stats	Basic performance data including shots, free-kicks, and corners with x/y coordinates
Player Stats	Live performance data including passes, tackles, and clearances with x/y coordinates
Touches Pro & Video Sync	-

Coverage Tiers In Detail

(B) = Before | (L) = Live | (A) = After/Post-match

COVERAGE TIER	COVERAGE TYPE	DESCRIPTION	COMMENTS	TIMING
Post-Match Data				
1	Results (A)	Score	Post-match result of the match	Opta: Within 1 hour Sports Data API: Different intervals

Coverage Tier	Coverage Type	Description	Comments	Timing
2	Results (A)	Scorers	Post-match result of the match and goal scorers	Opta: Within 1 hour Sports Data API: Different intervals
	Scorers (A)
